

Service: *Civil-kickstart*

Whether you are an existing user or just considering AutoCAD Civil 3D, don't let your unfamiliarity with the best civil engineering application on the market hold back your business.

What does the AutoCAD® Civil 3D™ software give you?

A powerful tool for ground modeling, road design, land reclamation, grading and land planning that has been designed to increase productivity. It's parametric design creates intelligent relationships between objects enabling dynamically updated design changes, providing greater accuracy, flexibility and consistency. The result is a substantial savings in both time and money.

How then do you move this forward within your business?

Civil-kickstart from AIT Spatial is a concept created to solve the problems experienced with a new or upgrade implementation. If you have hesitated to invest in or to fully embrace AutoCAD Civil 3D because of the concerns you have over installation, implementation, customization and training costs, then consider the services below to get you started.

Civil-kickstart gets you up and running – FAST

Civil-kickstart comprises a suite of initial services enabling you to be up and running with AutoCAD Civil 3D in a realistic time frame ensuring minimum downtime and productivity loss. These services include:

- Ø Identification of your Software aims – Defining your aims, priorities or milestones for Civil 3D
- Ø Product and application advice – Defining a range of applications for your business
- Ø Pilot – Planning a pilot scheme prior to the main implementation
- Ø Post pilot assessment – Assessing the success of the Pilot scheme
- Ø Training – Defining and planning training suitable for your use of Civil 3D
- Ø Installation – Ensuring that Civil 3D is installed and available to all
- Ø Templates – Ensuring the correct Civil 3D templates are installed, available and centralised
- Ø Workspaces – Creating a customised Workspace for your team's use
- Ø Profiles – Ensure correct access to support files, printers, templates etc
- Ø Styles – Defining and centralising Civil 3D Styles suitable for your use and ensuring they are available to all and stored in templates
- Ø Palettes – Customising Tool Palettes
- Ø Data Shortcuts – Defining and implementing Data Shortcuts for project sharing
- Ø Vault – Configuring and customising Vault for team use
